PROFILE

Product Designer with 4 years of experience across product UI/UX and go-to-market design for enterprise SaaS and consumer platforms. Currently Lead Product Designer at Scanflow, an AI-powered scanning and computer vision product, where I own every design need across product engineering and GTM — user flows, design systems, and high-fidelity interfaces through to AI-generated video, social campaigns, and web. Skilled in user research, wireframing, prototyping, information architecture, usability testing, and responsive design, with hands-on experience using AI tools to accelerate design workflows and developer handoff.

EXPERIENCE

Lead Product Designer

APR 2025 – PRESENT

Scanflow — Chennai / an OptiSol Business Solutions company

- Own end-to-end design for **Scanflow**, an AI-powered scanning and computer vision platform deployed across Automotive, Manufacturing, and Pharma — covering every design need across product engineering and go-to-market.
- Lead product UI/UX: user flows, information architecture, wireframes, high-fidelity Figma prototypes, and the Scanflow design system, validated through usability testing and responsive QA.
- Deliver full-funnel GTM design — AI-generated product video (Leonardo.ai, Google Veo 3, Runway ML), social and campaign banners, landing pages, and sales collateral — strengthening brand credibility and visual consistency.
- Built reusable design systems and content templates for the website, blogs, insights, and success stories, reducing production turnaround and enabling non-designers to ship on-brand assets.
- Partner with product managers, engineers, and marketing in Agile sprints on accessibility reviews, design QA, and design-to-development handoff.

UX Engineer

APR 2024 – APR 2025

OptiSol Business Solutions — Chennai

- Designed responsive web and mobile interfaces for **Just Be Lekker**, a property management and travel booking platform with multi-role experiences across Host, Guest, and Admin.
- Created booking flows, dashboards, and admin panels focused on clean UX, usability testing, and responsive behaviour across mobile, tablet, and desktop breakpoints.
- Contributed to user journey mapping and interface optimisation across multiple POCs and internal web and mobile applications.

UX/UI Designer

SEP 2022 – APR 2024

Shrewd Business Solutions — Coimbatore

- Designed responsive websites, mobile applications, and analytics dashboards for E-commerce, Education, Food, and Marketing clients, from low-fidelity wireframes through high-fidelity UI.
- Delivered end-to-end UX/UI for live products including Homepreneur Awards, SSVM Awards, TiECON Chennai, Practills, and Poppy Marketer, improving usability across landing pages and registration flows.
- Built interactive prototypes, brand identity assets, and micro-interactions using Figma, Adobe Illustrator, and After Effects; facilitated design sprints and stakeholder workshops in Miro and FigJam.

KEY SKILLS

- Product Design
- Design Systems
- Wireframing & Prototyping
- User Research & Usability Testing
- Responsive & Mobile-First Design
- Information Architecture
- Interaction & Motion Design
- GTM & Brand Design
